## Product Images

## Description

Idaho 150 grass, featuring a lush, dense arrangement of blades. The turf showcases a mix of vibrant green tones with some lighter, yellowish-green accents, creating a natural, four-tone effect. The blades are made from textured polyethylene, with a pile height of approximately 1.5 inches and a face weight of about 50 oz., giving it a soft yet sturdy feel. The edges reveal a black backing, and the overall appearance suggests durability, with heat and frost resistance, enhanced by UV stabilizers to prevent fading. The customizable

design makes it suitable for both residential and commercial use.
